

## Process Excellence From Planning to Results!

QPR Suite 2012 offers powerful tools to help your organization achieve and maintain a state of process excellence. The products included in the Suite cover all facets of process, performance and enterprise architecture management, from planning to results!

Although the composition and product names have been renewed in QPR Suite 2012, all functionalities of our widely used products are also included in this new Suite.

### With QPR Suite 2012 Your Organization Will

- ▶ Gain Insight in Your Processes!
- ▶ Improve Awareness of Your Processes!
- ▶ Align Your IT with Business!
- ▶ Meet Your Targets!
- ▶ Improve Operations in a Systematic Way and Continuously Achieve Better Results!

## QPR Suite 2012

The next version of the QPR product family offers you a better, more stable and enhanced platform for managing the execution of your strategy and continually improving your operations under the banner of "Process Excellence, from Planning to Results!". Compared to previous versions, the QPR Suite now also includes QPR ProcessAnalyzer, a software for Automated Business Process Discovery,

and QPR EnterpriseArchitect, which helps you align IT resources with your business operations. QPR Metrics replaces QPR ScoreCard and now offers better support for operational performance measurement. Although all QPR Suite 2012 products are essentially stand-alone, when combined they form a solid entity that help your organization to improve operations systematically and to continuously achieve better results. The

QPR Suite 2012 products are available as licenses or via subscription. QPR Software and our customers have received numerous recognitions from leading research firms such as Gartner, Forrester Research, Ventana Research and Bloor Research, as well as international organizations like EFQM, the European Union and many national quality organizations.

**“Although all QPR Suite 2012 products are essentially stand-alone, when combined they form a solid entity, helping systematically to improve operations and achieving continuously better results”**

Maija Erkheikki, Vice President, Software Sales International, QPR Software

**QPR Suite 2012** offer you the following software products:

**QPR ProcessAnalyzer** allows you to speed-up process improvement. Using data stored in operative business systems, QPR ProcessAnalyzer re-creates processes exactly as they unfold in reality. Unlike complex academic process mining software, QPR ProcessAnalyzer is uniquely focused on the business user. With a few clicks, the user sees the ‘as-is’ business process models, views resource usage over time, discovers paths leading to important activities, and benchmarks performance. In addition to ad-hoc or project-based analysis, it is easy to connect QPR ProcessAnalyzer to virtually any cloud-based or on-premise system for continuous monitoring or automatic reporting.

**QPR EnterpriseArchitect** offers all the stakeholders involved in your Enterprise Architecture Management (EA) program a single design environment that covers your business processes, your business architecture, your applications, your data and your systems. The completely open metamodel permits your team a flexible approach to EA and supports them in applying any of the available frameworks and standards as well as customized approaches. QPR EnterpriseArchitect helps you to manage all EA domains in one tool, analyze assets, relationships and dependencies.

**QPR ProcessDesigner** offers to any organization a powerful solution for describing, analyzing, communicating and improving its processes. The Software is uniquely focused on business users, founded on the premise that effective process management is impossible without their active participation. It supports multiple process-oriented management initiatives and methods, like quality management, regulatory compliance, Business Process Analysis and Business Activity Monitoring.

**QPR Metrics** offers a fast to implement and flexible, web-based environment for managing objectives effectively. The software is capable of supporting multiple management standards, methodologies and initiatives. Its helps managers to save significant time and effort collecting, consolidating and reporting performance information. As being more than just a performance reporting solution, QPR Metrics adds powerful online collaboration capabilities. Employees can add contextual information to the numbers, while managers can turn insight into action by assigning tasks and monitoring progress.

## **QPR Suite 2012 - Process Excellence from Planning to Results!**
